Spectacle lens cleaning pad - is divided into liquid storage section and dry pad with fluid soaking into pad upon opening pack

ROCHER P 16.07.79-FR-018331

Q34 (13.03.81) A45d-34 B65d-75/30 B65d-81/32
16.07.79 as 018331 (6pp1207)

The pack consists of two aluminium sheets sealed or welded at the end and across the middle to form two compartments (2,3). One compartment (2) holds the liquid (4) and the second compartment holds a dry pad.

Two notches (6) are cut in the aluminium foil to allow tearing open of the pad. These may also be replaced by a cord. The pack may also be joined to other packs by its edges to afford a larger supply.
